

Vehicle Washing

The advantages of having a clean fleet of trucks are an important part of a company's maintenance program:

- A good reflection on the company
- A positive motivator to the driver
- Better impression for the DOT
- Emphasis on customer satisfaction
- Less road dirt on the truck either weighing it down or causing wind resistance
- Reduced opportunity for winter road treatments to adversely affect the equipment

K-Factor filters provide an opportunity to recycle wash water and address compliance with discharge regulations.

For more information on how K-Factor filtration systems can improve your fleet washing processes, provide us [your requirements](#) and we will respond within two business days.

If you have any questions or would like to access current information about K-Factor Filter installations kindly review our [blog](#). There is no obligation and we appreciate any questions or comments you care to share
